Isoflupredone Acetate (BANM, USAN, rINN) ⊗

Acetato de isoflupredona; 9 α -Fluoroprednisolone Acetate; Isoflupredone, Acetate d'; Isoflupredoni Acetas; U-6013. 9 α -Fluoro-11 β ,17 α ,21-trihydroxypregna-1,4-diene-3,20-dione 21-acetate.

Изофлулпредона Ацетат

C₂₃H₂₉FO₆ = 420.5.

CAS — 338-95-4 (isoflupredone); 338-98-7 (isoflupredone acetate).

Pharmacopoeias. In *US* for veterinary use only. **USP 31** (Isoflupredone Acetate). Protect from light.

Profile

Isoflupredone acetate is a corticosteroid that has been used for its topical glucocorticoid activity (p.1490) in allergic rhinitis. Isoflupredone is also employed in veterinary medicine.

Preparations

Proprietary Preparations (details are given in Part 3)

Multi-ingredient Israel: Proaf.

Loteprednol Etabonate (BANM, USAN, rINN) ⊗

C₂₄H₃₁O₇ = 467.0.

CAS — 129260-79-3 (loteprednol); 82034-46-6 (loteprednol etabonate).

ATC — S01BA14.

ATC Vet — QS01BA14.

Profile

Loteprednol etabonate is a corticosteroid used for its glucocorticoid activity (p.1490) in the topical management of inflammatory and allergic disorders of the eye. It is usually used as eye drops containing 0.2 or 0.5%.

Prolonged application to the eye of preparations containing corticosteroids has caused raised intra-ocular pressure and reduced visual function.

Мазипредон

C₂₆H₃₆N₂O₄ = 442.6.

CAS — 13085-08-0.

Profile

Mazipredone is a corticosteroid used topically for its glucocorticoid activity (p.1490). It is used as the hydrochloride with miconazole in the treatment of fungal infections of the skin.

When applied topically, particularly to large areas, when the skin is broken, or under occlusive dressings, corticosteroids may be absorbed in sufficient amounts to cause systemic effects (p.1490). The effects of topical corticosteroids on the skin are
